Of course...☺

The poly tanks are PT1 through PT6 (we called the poly in the WWT area, by the lime, PT6. 6-12" of liquid, pH is 0). Then I included the two RO tanks in the WWT area and the poly that is by the north bay in the warehouse. The empty is PT5.

The full vats are the one in the main warehouse with the sodium bicarbonate and the big round one on the south end of the site. The empty is the one in the main warehouse that had been emptied of oil. It was by the ramp.

Daniel:

Of course, more questions:

Poly Tanks: I am assuming the poly tanks we are referring to are: PT1, PT2, PT3, PT4, PT5 what are the others and where are they located?

Vats: Which ones are these? One in main warehouse surround by Sodium Bicarbonate

Thanks

Ok,

Poly Tanks:

8 with materials; 1 empty

Totes:

37 with materials; 123 empty

Vats:

2 with materials; 1 empty

Drums:

113 with materials; 43 empty

Misc Containers:

12 with materials; 13 empty

EPA Lab containers: 467

I think this is relatively accurate.
Let me know if you have any questions.
Thanks,
Daniel

Daniel:

I am having trouble deciphering this table. I am looking for these numbers:

Poly Tanks: # with materials # w/o materials (empty)

Totes: # with materials # w/o materials (empty)

Vats: # with materials # w/o materials (empty)

Drums: # with materials # w/o materials (empty)

Misc Containers (5 gallon or less): # with materials # w/o materials

EPA Lab Containers: # of containers

I know the above will not be perfect but it will provide me with a good estimate. Give me the best you can with the information that you have.

Also, I noticed that one of the containers at the back left side of the haz cat bay was broken.

Thanks

This is the latest spread sheet that LeRoy has put together from our data.

Note that each layer has its own line so some containers have multiple lines.

Let me know if you have any questions.

Thanks,

Daniel

Daniel:

Can you resend me the hazcat/compatibility table? I want to try to divide the number up into Poly Tanks, Totes, Vats, Drums, Misc Container (Less than a Drum)

Thanks

Good morning,

We have 159 empty containers and 165 that have material in them.

Let me know if you need anything else.

Daniel

Daniel:

Can you give me the number of drums/totes/misc containers that are considered RCRA empty and those with materials? I have to do a report.

Thanks
